## EDUCATION

### WASHINGTON UNIVERSITY IN ST. LOUIS

St. Louis, MO

- Bachelor of Science majoring in Mathematics and Computer Science | GPA: 3.9/4.0
- Masters in Engineering Data Analytics and Statistics | Expected Graduation (BS/MS): May 2027
- Activities: McKelvey Scholars in Engineering | WashU Product Space | Google Student Developer Club
- Relevant Coursework: Launching & Scaling Enterprises, Intro to AI, Intro to Data Science, Technical Writing
- Steven R. Lowy Scholar | HackWashU Winner, Master Division | Olin Data & Values Case Competition Winner

## PROFESSIONAL EXPERIENCE

### SALESFORCE

San Francisco, CA

Associate Product Manager Intern – Agentforce Commerce

May 2026 – August 2026

- Leading end-to-end delivery of a reviews/UGC integrated shopping agent prototype; defined technical requirements with external partners and worked with FDEs to build backend to ingest data sources with semantic retrieval to agent
- Building an end-to-end unified analytics dashboard for 200+ customers by merging multiple data sources to engineer conversion-based business metrics for customer ROI; Defined V0 metrics and scoped future headless analytics approach
- Delivered AI-Native Prototyping presentation to 100+ PMs cloud-wide with Cursor and Claude Code workflows

### DEEPGRAM (YC16)

San Francisco, CA

Voice AI Engineering & Product Intern

May 2025 – Present

- Boosted product adoption by 15% and usage by 10% for users under 25 by leading cross-functional efforts to design and launch features, demos, and marketing campaigns that better targeted emerging founders and developers
- Scoped and Engineered Natural Language AI flow builder for instant voice agent creation for engineering teams
- Wrote agent skills to allow any agent to generate, validate, and publish voice agent flows for customer problems
- Generated \$XXk ARR through 10+ voice agent MVP demos by translating customer needs to product prototypes
- Defined and engineered a system of visual and technical metrics to fairly compare transcription models for agents
- Designed and presented background filtering process with 90% accuracy using frequency analysis and diarization

### QUTURE FASHION (SECONDHAND FASHION MARKETPLACE)

St. Louis, MO

Product Manager

August 2024 – December 2024

- Developed a feed ranking algorithm to reflect user pain points learned from leading 30 customer research sessions
- Acquired >200 new users by creating and executing a Go to Market strategy that appealed to university students

Software Engineer

April 2024 – December 2024

- Created Python-based clothing recommendation algorithm based on style, enhancing user feed experience by 20%
- Solved new member onboarding problem by coding tutorial screens and simplifying UI based on user A/B testing

### WASHINGTON UNIVERSITY COMPUTATIONAL IMAGING GROUP

St. Louis, MO

Machine Learning Research Assistant

August 2024 – December 2024

- Led development of image denoising model for tree data, worked with PhDs to guide analysis and refine results
- Executed a 570% increase in average SNR over noise levels by A/B testing model architectures and channels

## LEADERSHIP AND PROJECT EXPERIENCE

### MCKELVEY FELLOWSHIP

St. Louis, MO

President/Founding Exec Member

December 2024 – Present

- Co-founded a club that connects WashU's engineering and builder ecosystem with top students and opportunities
- Lead day-to-day club activities, website development, recruitment, and board of Jim McKelvey (Co-Founder, Square), Hal Barron (Founder, Altos Labs), Maxine Clark (Founder, Build-A-Bear) and Dev Bala (VP Product)
- Organized & hosted a hackathon sponsored by SVC and Meta with 100+ attendees with >\$2000 worth of prizes
- Hosted 20+ chats with YC founders and FAANG engineers alongside 5+ exclusive company recruiting events

### VOCALFLOW

- Built a voice-first V0-style builder that lets users talk through an idea from ideation to implementation, generating UI and code automatically; reached 20k+ impressions demonstrating interest in conversational product-building
- Implemented semantic intent detection to shift between brainstorming, code generation, and live website preview

### EVA (EMT Virtual Assistant) (Google DevFest Hackathon Winner, 1 of 650+ registrants)

- Created solution for automating ePCR forms for hospitals by recording EMT interactions with XR headset
- Built XR voice assistant, EVA, a downloadable that allows logging medicine, facial recognition, and recording
- AI Pipeline takes XR recording, cleans and diarizes with 11Labs, creates eCPR content with Gemini, fills out form with Browser Use agents, and emails hospital all before the ambulance arrives with the patient, saving time and lives

## SKILLS AND INTERESTS

**Skills:** Java, Python, Javascript, R | Microsoft Suite (Excel, PowerPoint, and Word) | Cursor | Figma | Claude Code

**Interests:** Drumming | Poker | NFL | Marvel | Fantasy Football | Soccer | Cooking | FIFA | Venture & Startups
